

The **Pop Up A-Frame** is the most convenient banner system designed for indoor or outdoor use. It is very lightweight, it takes less than 1 minute to set up and down, and it offers double sided graphics. This is one of our fastest moving outdoor eventing products as it can be used for directional purposes, dual branded and multiple brands across one event, and when used with the supplied ground pegs it can withstand any weather conditions. Our Pop Up A-Frame consists of a collapsible fibreglass framework with two graphic panels which simply pops open when unpacked from the bag, similar to a typical car dash protector. What sets our Pop up A-frame apart from the rest is the print substrate we use - 250gsm 100% waterproof coated canvass. The durability this give the product is unrivalled. It is supplied with four ground pegs and a compact circular nylon carry bag for easy storage. The Pop Up A Frame is the perfect solution if double sided branding, two way traffic and instant set up and fold down is required. If you require a double sided A Frame Banner that sets up in seconds then look no further.
